Discussion Questions for Lecture 14

Pronyk et al. Effect of structural intervention for the prevention of intimate-partner violence and HIV in rural South Africa. Lancet 2006; 368:1973

1. Why was this a cluster, rather than an individual randomized trial?
2. What is the difference between “intent-to-treat” and an “as-treated” analysis?
3. What type of analysis was used in this paper?
4. Summarize the findings of this structural intervention
5. Do you think structural interventions can mitigate intimate-partner violence?
